

CTC Blue Strike

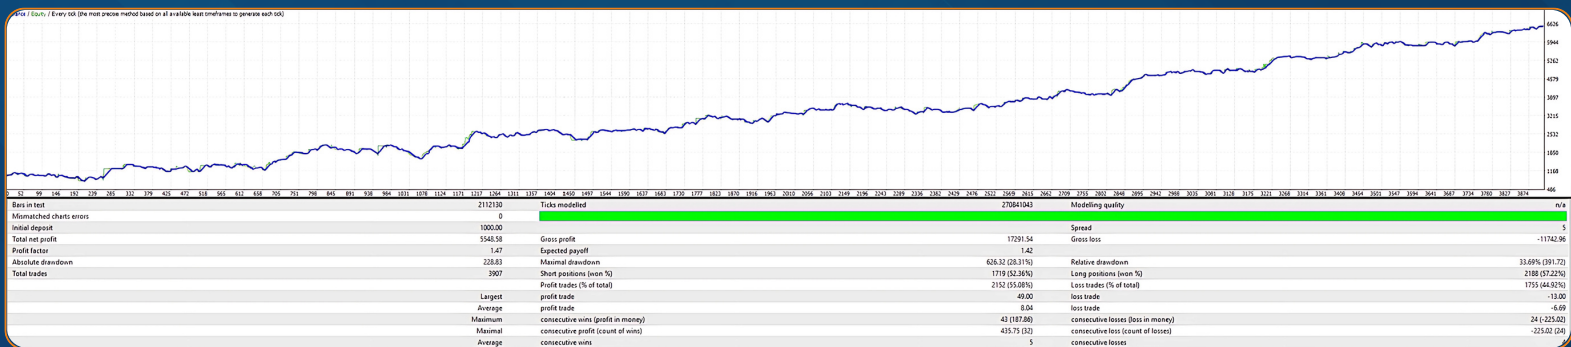

WHAT IS CTC BLUE STRIKE ?

The software works on a breakout basis, it has 6 independent strategies that can work in synergy with each other or separately. Each of them with its relative tp, sl or trailing, the bot is completely automatic and does not require no intervention on the human setting to work. the bot is composed of magic numbers for brokers, slippage optimizer to avoid unpleasant surprises during the news....

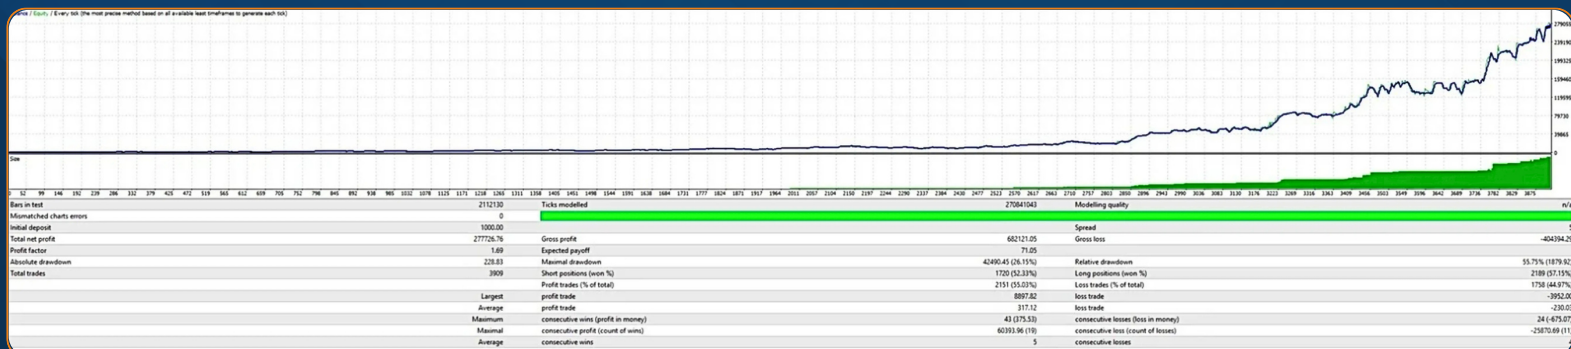

BACKTEST DATA

**6 YEAR BACKTEST FROM
01.01.2018 TO 15/12/2023**

**ALL 6 STRATEGIES WORKING TOGETHER WITH FIXED
LOT 0.01 FOR ALL 6 YEARS**

**6 YEAR BACKTEST FROM
01.01.2018 TO 15/12/2023**

**ALL 6 STRATEGIES WORKING TOGETHER WITH
0.01 LOT EVERY 900 OF CAPITAL**

CTC Blue Strike

INSTRUMENTAL AND FUNCTIONS

SOFTWARE ITEMS AND PARAMETERS

- **Magic for brokers:** identificativo letto da chi vi permette di operare a mercato.
- **Base magic number:** identificativo che serve al bot per operare e riconoscere le operazioni, consiglio di non modificare.

LOT SIZE SETTINGS:

- **Use startlots:** il bot utilizza il lottaggio che gli viene impostato nella voce startlots.
- **Use lotsize step:** il bot aggiunge uno 0.01 al lottaggio base ovvero(0.01) ogni volta l'equity raggiunge il doppio della voce impostata a lot size step.
- **Esempio** (capitale di 1000 e lot size step a 900,il bot inizierà ad operare a 0.01 non appena l'equity raggiunge valore di 1800 inizierà a 0.02, non appena l'equity raggiunge valore 2700 inizierà a operare a 0.03 e così via.
- **Consiglio** come valore 1100, più lo si abbassa più aumenta l'aggressività.
- **CTC Blue Strike breakout A,B,C,D,E,F:** strategie operative a buy stop e sell stop con logiche completamente diverse, vedere i backtest di ogni strategia singola.
- **Show_tpsl:** se messa a false il bot non piazza nessun tp o stop loss ma li tiene in memoria, consiglio l'uso di questa funzione in modo da non mostrare a broker o prop i nostri valori di tp e sl per evitare manipolazioni.
- **Slippage_optimizer:** funzione logica che monitora lo slippage del server e non fa innescare il pendente se le condizioni necessarie non sono rispettate, utilissimo in presenza di news a forte impatto, consiglio sempre on.
- **Maximum allowed spread:** consistenza di spread massimo che se raggiunta non fa innescare il pendente.
